

Understanding Your Bill

- 1
GST
The 5% calculation is based on the total cost of your bill.
- 2
Total Current Charges
Total charges for the billing period displayed on the invoice.
- 3
Total Due
Total amount to be withdrawn from your bank account.

- Who should I call in case of a power outage or an emergency?
- The contact information for your Distributor or Wires Service Provider is listed on page 1 of your invoice. Please make note of this information for future reference.

General Message

We want to take a moment to thank you for trusting us as your local community retainer. We'll continue to fight the good fight on your behalf as we look for ways to help reduce the costs on your bills. Your continued support is vital to us, so if there is anything else we can do for you, don't hesitate to get in touch with us using the contact information below.

Pre-Authorized Bank Withdrawal of \$221.53 will occur on or after Oct 04, 2023.

Please note that our Energy Agreement terms have been updated on July 7 2023. See website for details. We thank you for your continued support of a small local business.

4
Energy Charge
This is the cost of energy you have used in a billing period. These charges are expressed in cents per kilowatt hour (¢ per kWh) for electricity or dollars per gigajoule (\$/GJ) for natural gas.

5
Delivery Charge
These charges are the regulated cost for the Distributor or Wires Service Provider to deliver energy to consumers. They can be broken down further into:

- Distribution Charge:** the cost of building, operating and maintaining the local distribution system.
- Transmission Charge:** the cost of building, operating and maintaining the provincial power grid or the transmission pipelines.
- Rate Riders:** a temporary credit or charge approved by the regulator.
- Local Access Fee:** the energy company, on behalf of local government, collects this fee to access municipal land to construct, maintain and operate distribution systems serving the residents of the city, town or village.

6
Cancel/Rebill
This means the initial charges for the referenced billing period are being cancelled and new charges are being billed. There are a number of reasons why previous billed charges may be cancelled. For example, a corrected meter reading or the replacement of an estimated (or calculated) meter reading with an actual meter reading.

7
Site ID Number
The Site ID is the equivalent of your home's street address but for your electric or gas meter. Utility companies use this number to identify and bill your home for energy used. It is important to make sure this number is correct when signing a contract because it will ensure you will be billed for the correct meter and location.

8
Meter Reading
Each month, the Distributor, ATCO Gas or the Wires Service Provider (ATCO, ENMAX, FortisAlberta, EPCOR, or other) will send an electronic file to the energy retailer. This file contains the current meter read and the date the meter was read. The reading could be an actual reading or a calculated estimate. The difference between the current read and the previous read is your actual consumption during the defined time period. The actual consumption is used to calculate how much you are billed.

9
Administration Charge
This is the interest as a credit on any security that your retailer is holding for the duration of your account.

10
Interest on Prudential
This is the interest as a credit on any security that your retailer is holding for the duration of your account.
